

# Clinical Face Shield.

Medical grade personal protective equipment

Mother's is supporting the demand for Face Shields in the fight against COVID-19 and other infectious diseases. We are ensuring continual supply for the protection of those who risk their lives to care for others.

Developed in conjunction with health professionals, our Clinical Face Shield is a light weight, single use device, providing superior head coverage. The device is manufactured in Australia in an ISO 13485 quality certified facility.

## All new lightweight face shield co-designed with ICU clinicians to maximise head coverage
